

SPECIAL SYLLABUS DESCRIPTION, PhD

The Faculty of Mathematics and Natural Sciences

Candidates can request to include a special syllabus course in their educational component. This course must be in the form of literature and methodological studies within topics or fields of study where suitable educational options do not exist.

The PhD committee at your unit will evaluate the course scope, content, academic level, number of credits, and form of assessment. Courses are awarded 1 credit for 25-30 hours of work.
