

			LAPPJÄRVI, SUVASVESI AND PAASSELKÄ METEORITE CRATERS
49	7.1	Badjukov, D.D. & Raitala, J.	Ni-containing sulfides in impactites of the Lappajärvi, Sääksjärvi, Suvasvesi South, and Paasselkä meteorite craters
50	7.1	Bäckström, A. et al.	Gravity model of the Lockne Impact Crater
51	7.1	Dypvik, H. et al.	The search for impact structures in Norway
52	7.1	Elbra, T. & Pesonen, L.J.	Continental Deep Drilling – new challenges for geophysics
53	7.1	Frisk, Å.M. et al.	The aftermath of marine impacts: Faunal recovery and sedimentation in the Ordovician Tvären crater, Sweden
54	7.1	Vishnevsky, S. et al.	Popigai impact fluidizites: new data on opaques
55	7.1	Öhman, T.	Dark veinlets in the granitoids of Saarijärvi, Söderfjärden and Lappajärvi impact structures
56	7.2	Aittola, M. et al.	Geology of Noachis Terra, Mars
57	7.2	Bondarenko, N.V. et al.	Roughness anisotropy of Venus surface.
58	7.2	Gurgurewicz, J.	Erosional landforms and rock material in Noctis Labyrinthus (Valles Marineris, Mars)
59	7.2	Kreslavsky, M.A. et al.	Impact Craters on the Northern Lowlands of Mars.
60	7.2	Lahtela, H. et al.	Analysis of an enigmatic crater in Arabia Terra, Mars
61	7.2	Leitner, J.J. & Firneis, M.G.	Comparison of Catalogue-Induced Heat Loss in Venusian Coronae
62	7.2	Törmänen, T.T. et al	Morphological and topographical characteristics of Epona Corona, a multiple corona on Venus
63	8.1	Ahtala, T. et al.	Kuusjärvi wollastonite–calcite marble, a new potential CCC

Session 7. Room L7

9.10-9.50 **Ori, G.G. *Keynote***

Jouko Raitala et al.

The geological history of a large lacustrine body on Mars:
the Juventae Chasma

Session 7.1. Room L7

10.20-	Dypvik, H. et al.	Did the Mjølnir asteroid impact ignite Barents Sea hydrocarbon source rocks?
10.40		
10.40-	Kalleson, E. et al	Post impact deposits in the Gardnos impact structure, Norway
11.00		
11.00-	Bäckström, A. et al.	ESIR at Ilumetsa – an example of international student cooperation in impact crater research
11.20		
11.20-	Plado, J & the ESIR Working Group	The Ilumetsa meteorite crater field, SE Estonia - results of the geophysical campaign
11.40		
11.40-	Kohonen, J. & Vaarma, M.	Sedimentary rocks in Finnish impact structures - pre-impact or post-impact?
12.00		
12.00-	Öhman, T. et al.	Polygonal craters of Argyre region, Mars – Clues to cratering mechanics?
12.50		
13.30-	Ormö, J. et al.	Influence of target on the cratering process: Laboratory experiments, field observations and numerical simulations
13.50		
14.10		
14.10-	Ruotsalainen, H.E. et al.	Gravity survey of the Keurusselkä meteorite impact structure
14.30		
14.30-	Tuisku, P. & Hanski, E.	Planar deformation features in quartz phenocrysts from Palaeoproterozoic felsic tuffs at Pechenga, Kola Peninsula, Russia
14.50		
14.50-	Versh, E. et al.	Development of potential ecological niches in IHT systems: the small-to-medium size impacts
15.10		
15.10-	Salminen, J. et al.	New data for calibrating Kaapvaal craton's apparent polar wander path - Vredefort impact crater, South Africa
15.30		

Session 7.2. Room L7

16.00-	Kohout, T. et al.	Magnetic record of ordinary chondrite chondrules
16.20		
16.20-	Korteniemi, J. et al.	HRSC mapping of crater floor depressions in Hellas region, Mars
16.40		
16-40-	Kostama, V.-P. et al.	Analysis of the Reull Vallis fluvial system, Mars.
17.00		
17.00-	Sharkov, E.V. & Bogatikov, O.A.	Comparative study of tectonomagmatic evolution of the Earth and the Moon
17.20		
17.20-	Raitala, J. et al.	Alluvial fan in Icaria Planum, Mars.
17.40		
17.40-	Rice, J.W. jr. & Athena Science Team	Spirit's Exploration into the Origin and Evolution of the Columbia Hills, Mars
18.00
