April 9 2024

1 Peace science infrastructure (PSI)

2 UCDP database

3 Event extraction

4 A Survey of Available Datasets

## PSI

- ▶ Interdisciplinary collaboration:
  - ▶ PRIO (Peace Research Institute Oslo)
  - ▶ LTG, UiO
  - ▶ The Department of Peace and Conflict Research (DPCR), Uppsala University
  - ▶ The Department of Political Science, UiO

## Motivation

- ▶ Social sciences rely on high-quality **event data**.  
*Who did what to whom, where and when*
- ▶ Currently: a growing number of databases
- ▶ Created to answer research questions
- ▶ Often annotated by human experts: time-consuming, inefficient use of resources and expensive

## Goal

- ▶ Develop a robust infrastructure capable of automatically extracting and structuring event data and establishing shared standards and tools to serve as the foundation for a new industry standard in peace research.

1 Peace science infrastructure (PSI)

**2 UCDP database**

3 Event extraction

4 A Survey of Available Datasets

## Uppsala conflict data program (UCDP)

- ▶ Recording armed conflicts
  - ▶ One of the largest and most widely used event dataset
  - ▶ Manually annotated by human experts
  - ▶ News articles as sources
- 
- ▶ Huge amount of data
  - ▶ High quality data
  - ▶ Closed domain: Armed conflict leading to fatalities at specific time and place.

SANAA (Reuters) - Islamic State's Yemen branch claimed responsibility for a car blast outside a mosque used by the Houthi group on Monday that police sources and medics said killed five people and wounded seven others. The blast hit the Moeed mosque in Sanaa, which is used by the Houthis, the police sources said, and is close to the house of one of their leaders. The Houthis are pushing for more rights for Yemen's Zaydi Shi'ite Muslims, regarded as heretics by the militant Sunni Islamic State.

1 Peace science infrastructure (PSI)

2 UCDP database

**3 Event extraction**

4 A Survey of Available Datasets

## Event extraction

- ▶ Event representations are complex structures describing a **change of state**, referring to a specific occurrence of **something that happens** at a particular **time and place**, involving several **participants** and other relevant entities [Doddington et al., 2004]

At daybreak on the 9<sup>th</sup>, the terrorists set off a truck bomb attack in Nazareth.

## Event trigger

- ▶ A word or a phrase that most clearly expresses the occurrence of the event

[Doddington et al., 2004]

## Event arguments

- ▶ Entities that are part of the event. Includes participants and attributes

[Doddington et al., 2004]

## Argument role

- ▶ The relationship between an event and its participants [Dodington et al., 2004]

## Our Paper

Jointly describing event datasets:

- in natural language processing
- in political science.

## Scope

Domain of social and political conflict and unrest.

Focus on the most central datasets, while keeping a diversity of approaches.

## Scope

Domain of social and political conflict and unrest.

Focus on the most central datasets, while keeping a diversity of approaches.

## NLP Event Extraction Datasets

ACE2005, DocEE, Light&Rich ERE, MAVEN, MEE, MUC-4, WikiEvents. . .

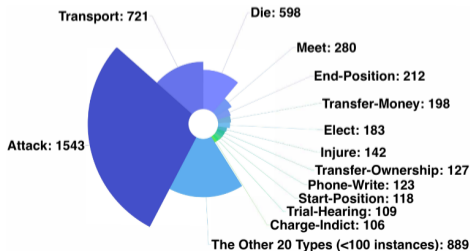

## Scope

Domain of social and political conflict and unrest.

Focus on the most central datasets, while keeping a diversity of approaches.

## NLP Event Extraction Datasets

ACE2005, DocEE, Light&Rich ERE, MAVEN, MEE, MUC-4, WikiEvents. . .

## Scope

Domain of social and political conflict and unrest.

Focus on the most central datasets, while keeping a diversity of approaches.

## NLP Event Extraction Datasets

ACE2005, DocEE, Light&Rich ERE, MAVEN, MEE, MUC-4, WikiEvents...

## Socio-political Event Databases

Hand-annotated Databases: ACLED, COW, GTD, IBC, MMAD, NAVCO, SCAD, SPEED, UCDP GED, USPVD...

Automatically-extracted Databases: GDELT, ICEWS, PHOENIX, POLECAT, TERRIER...

## 2. Source availability

## 2. Source availability

### 3. Abstraction gap

#### Definition:

Socio-political event databases record what happens in the world.

NLP event extraction datasets record what is in the text.

### 3. Abstraction gap: Disinformation

parliament, including a generation of new towns, by “bulldozing” through planning laws.

He said that Labour would also build homes on low-quality parts of the green belt, branding them the “grey belt” and a “dreary wasteland”.

The Labour leader also defended his plans to borrow to invest, promising that the party would “steer the ship on industrial policy” as he argued that the state must “kick-start growth”.

In a direct appeal to moderate Tories, he said: “If you are a Conservative voter who despairs of this; if you look in

### 3. Abstraction gap: Uncertainty in numbers

---

LONDON, Sept 21 (Reuters) - Russia will draft 300,000 reservists to support its military campaign in Ukraine, Defence Minister Sergei Shoigu said on Wednesday in televised remarks.

In Moscow's first update on casualty numbers in almost six months, Shoigu said 5,937 Russian soldiers had been killed since the start of the conflict.

### 3. Abstraction gap: Uncertainty in language

## Four fragile lives found ended in evacuated Gaza hospital

BY MIRIAM BERGER,  
EVAN HILL  
AND HAZEM BALOUSHA

JERUSALEM — The nurse in the

Sarah Davies, a spokeswoman for the International Committee of the Red Cross in Jerusalem, said the agency made no guarantees and could not safely reach the

wall" through broken buildings to reach the medical complex.

As he approached the neonatal intensive care unit, he said, he "started to smell a foul odor." He

### 3. Abstraction gap: Contextual world-knowledge

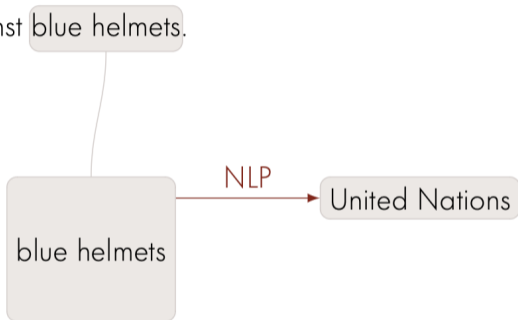

On October 17, 2022, 10 km from the Amachach camp (Tessalit) an IED exploded against blue helmets.

■ Forces of Hadi

## Machine Coding efforts

Not a bridge:

- ▶ rely on rule-based models not using token-level annotations
- ▶ ignore the abstraction gap, overcounting events
- ▶ source text is not available

## Machine Coding efforts

Not a bridge:

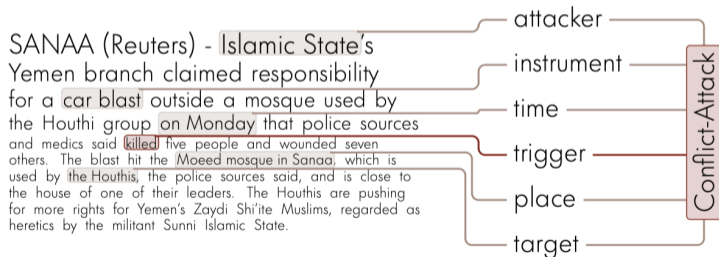

- ▶ rely on rule-based models not using token-level annotations
- ▶ ignore the abstraction gap, overcounting events
- ▶ source text is not available

## Notable efforts

- ▶ IBC-C, GLOCON & CASE shared tasks

## Document-level event extraction

- ▶ Majority of current techniques for event extraction centre on extracting events at the sentence-level
- ▶ Available datasets on Document-level: DocEE, WikiEvents..

## Lack of text-span annotations

- ▶ How to leverage UCDP data for training event extraction models?
- ▶ Some recent efforts use only record-level annotations formulated as a constrained generative event extraction task [Lu et al., 2021, Wu et al., 2023]

SANAA (Reuters) - Islamic State's Yemen branch claimed responsibility for a car blast outside a mosque used by the Houthi group on Monday that police sources and medics said killed five people and wounded seven others. The blast hit the Moeed mosque in Sanaa, which is used by the Houthis, the police sources said, and is close to the house of one of their leaders. The Houthis are pushing for more rights for Yemen's Zaydi Shi'ite Muslims, regarded as heretics by the militant Sunni Islamic State.

## Evaluation

- ▶ Some errors more severe than others

### More severe:

- ▶ The government of Iceland attacked China

### Less severe:

- ▶ Output: Time = April 2023
- ▶ Gold: Time = 15. April 2023
