Cross-cultural communication med Pellegrino Riccardi

What do you need most for succeeding?

The topic of mental health, suicide and the help and people to talk to should really be more in focus!

It is an important topic that should not just come up because we start talking about it, **it should be part of the seminar** to talk about it and make everyone aware of option of persons to go to and talk and to also take care of each other and pay attention to colleagues.

Knut and Linda made me feel heard, appreciated, valued, and safe. This is not always the case in academia, so I am very grateful for that.

Way too short. We could have spend more time on that and perhaps give us a little bit more on hand what we can do in certain situations. Who we contact, where to take courses etc.
